PROFILE INFO

My name is Damilola Onaopemipo Jerugba. I am a FullStack Developer, Technical Writer and Digital Artist

WORK EXPERIENCE

▶ **APRIL 2022 - SEPTEMBER 2022**
FULLSTACK DEVELOPER
OPENSPEC

Which aims to help Product Managers write better Product requirements with the help of AI by generating User Stories, Scenarios, Edge Cases, etc. I worked with NextJS as the full-stack framework, integrating it with Prisma and GraphQL code generation to provide a consistent bridge between the front-end and back-end and type declarations. I also implemented performance improvements to global state management.

▶ **2021 APRIL - PRESENT**
FOUNDER & CHIEF TECHNOLOGY OFFICER
JETRON TICKET

Building backend services with a payment gateway to provide users a way to pay for event tickets online, a platform for Youths around Nigeria to discover and host events, I built and managed teams from the ground up, supervising their code execution and implemented CI/CD with tools like GitHub Actions and Digital Ocean. I migrated the backend code from Django (Python) to Express (NodeJS). I worked with external APIs to help the experience of users like using Google Map's API to view events around them and ordering a ride with Uber's API.

▶ **2021 OCTOBER - 2022 APRIL**
LEAD FRONTEND ENGINEER
BRIMBLE

Converted UI/UX designs into fully functioning ReactJS applications, providing a user interface for thousands of users to help host their web applications with ease. I worked with new emerging web technologies like Progressive Web Applications (PWA) to aid website load times and better Search Engine Optimization (SEO). I also served as a technical article writer for the company.

▶ **2021 MARCH - PRESENT**
TECHNICAL WRITER

I write comprehensive dev articles to explain programming concepts. I mostly write on Frontend development through my personal blog, DEV.to, and LogRocket.

▶ **2019 MARCH - 2021 APRIL**
FREELANCE DEVELOPER & CONSULTING

I served as a freelance developer building web applications for clients and side projects, with tools like ReactJS, Prisma, Django Web Framework, NodeJS, MongoDB, and many more. I used tools such as Figma and Photoshop to design amazing User Interfaces with marketing techniques in mind to increase conversion rates, I also used many techniques to improve website load times, render times and search engine ranking.

First Class Graduate: Mechanical Engineering
at Landmark University

EXPERTISE

PROFESSIONAL SKILLS

Web development, FullStack development, Frontend Development, Backend development, Technical writing, Googling, Digital Art, UI/UX, Web3 Algorithms, PWA, SEO, Analytics, AWS, Scripting, Automation, etc.

PERSONAL SKILLS

Leadership, Loyalty, Teamwork, Integrity, Capacity Building, Social, Persistence, Fast Learner, etc.

PREFERED TECHNOLOGIES

ReactJS, Redux, Typescript, Javascript, CSS, SASS, HTML, Python, NodeJS, MongoDB, MySQL, PostgreSQL, Jest, Cypress, CI/CD, AWS, Serverless, C, C#, Arduino/C++, etc.

CERTIFICATES AND ACHIEVEMENTS

▶ College Representative for Engineering

▶ 30,000+ of readers on DEV.to

▶ Awarded Top 5 React Articles on DEV.to

▶ Awarded Top 5 Javascript Articles on DEV.to

▶ Project Manager Certificate (2019)

▶ Udemy Certificates

1. **React - The Complete Guide** (*by Maximilian Schwarzmüller*)
2. **Advanced CSS and Sass** (*by Jonas Schmedtmann*)
3. **Data Structures + Algorithms** (*by Andrei Neagoie*)
4. **Complete Web & Mobile Designer in 2022** (*by Andrei Neagoie*)
5. **Node.js, Express, MongoDB & More** (*by Jonas Schmedtmann*)
6. **React Native - The Practical Guide [2022]** (*by Maximilian Schwarzmüller*)
7. **Artificial Intelligence A-Z™: Learn How To Build An AI** (*by Hadelin de Ponteves*)
